

The **Duo-Drive**™

**THE DUO-DRIVE CUT-OFF SAW WITH PATENTED
TOP AND BOTTOM CONVEYOR BELT DRIVES**

The "Duo-Drive" saw has patents on a top and bottom belt drive cut-off saw, with updated patents being applied for.

THE WORLD'S FASTEST AUTOMATIC CUT-OFF SAW

ULTIMIZERS INC.™

contact@ultimizers.com

Ultimizers Inc. Duo-Drive™ Automatic Cut-off Saws Provide Faster Speeds, More Production and Better Accuracy Than Ever Before... Anywhere!

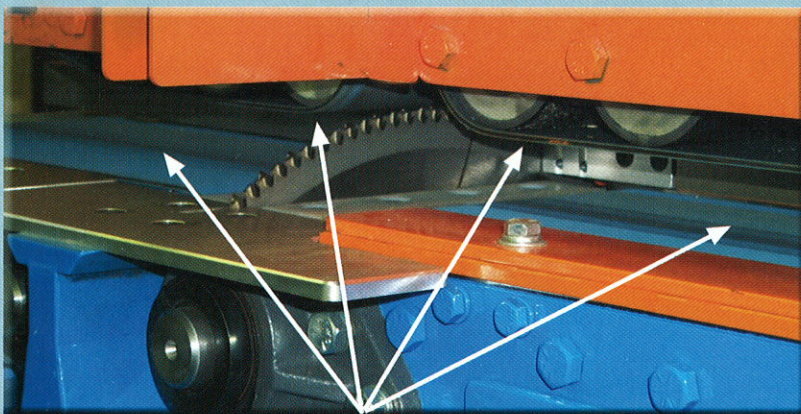

SPEED and PRODUCTION

- Duo-Drive™ offers feed rates 50% greater than previous designs.
- 1200 fpm between cuts on long parts are common.
- Ramp times to full speed are measured in milliseconds.
- You will get greater production due to the unique Duo-Drive™ design that grips the boards on both top and bottom. This system provides twice the grip of one-sided drive systems.

ACCURACY

The top and bottom rubberized conveyor belts found exclusively on the Duo-Drive™ saw, provides exceptional grip that resists slippage. This results in much better accuracy than found in standard roll feed designs.

The new Duo-Drive™ is the only saw in the world to have the patented top and bottom belt drive system.

“The Future of Optimizers is in Scanning!”

Ultimizers has designed the Duo-Drive™ saw for faster production rates to complement the newer, high-speed vision scanners. These scanners will replace crayon marking in nearly every case in the future. More production with fewer scanners means a better-quicker payback.
