

SR-5

SR-5

The SR-5 was designed to give the ability to saw and route on one vertical frame. This model can be changed from saw to router in less than one minute and has cutting accuracy of $1/64$ ". The SR-5U upgrade includes a 3 hp saw, a $3\frac{1}{4}$ " hp router, aluminum rollers, and an enclosed counterweight system. This machine is ideal for cabinet shops and other workplaces where both sawing and routing are done.
